# Day trip for Disney Youth Programme - Disney's Foundations for Career Success

The Faculty of Science and Technology (FST) organised a trip to Hong Kong Disneyland under the Disney Youth Programme - Disney's Foundations for Career Success on January 3, 2022. A group of 17 students from various FST programmes participated in this magical and meaningful excursion.

Disney's Foundations for Career Success is a programme that aims to prepare students for their future careers and self-development. Through understanding Disney's history, corporate and work culture as well as valuable experience-sharing by Disney Cast Members, it gives valuable reference for students in their search for the important aspects on a successful career.

Our students visited a few iconic spots at the park, including the Park Promenade/Main Entrance, Team Disney Building, Adventureland- Jungle River Cruise, Tomorrowland and Main Street, U.S.A. The trip ended as they received a bag of "magical information" for their career success.

Stay tuned on the Faculty's website and email for more upcoming activities!

Students expressed gratitude that they were delighted to be able to participate in this programme as it enlightens them in many ways in their future careers and personal development.
